About me

I am a versatile, backend-focused full-stack developer passionate about building robust, scalable applications and modular systems. With a proven track record of delivering high-quality, innovative solutions, I excel at enhancing and elevating software platforms. My collaborative approach and expertise ensure positive outcomes and exceed expectations in every project.

Check my GitHub [here](#).

Experience

Client: B2TECH

Role: Quality Assurance

Time: May 2025 – Present

- At B2TECH, I contribute as a Quality Assurance tester, ensuring that products meet the highest standards of functionality, usability, and performance.

Client: Beno Holdings

Role: Software Developer

Time: July 2023 – May 2025

- I worked at Beno Holding, where I continue to expand my expertise in full stack development. My role involves creating robust web applications, developing APIs, and building mobile apps. I focus on delivering high-quality, scalable solutions that meet the needs of our clients and enhance user experience.

Client: Andela

Role: Full Stack Developer

Time: Feb 2024 – November 2024

- During my time at Andela, I significantly enhanced my skills in full stack development, particularly with Node.js and React. The program provided me with in-depth knowledge and hands-on experience in building scalable and efficient web applications.

Client: SOLVIT AFRICA

Role: Backend Developer (on-site) **Time:**

Feb 2023 - May 2023

- I attended the SOLVIT AFRICA training program for three months, where I strengthened my skills in Django and DRF by building REST APIs. This experience allowed me to deepen my understanding of backend development and improve my ability to create efficient and scalable web services.

Client: UHDSS

Role: Full Stack Developer (Freelance) **Time:**

Feb 2022 - Feb 2024

- At UHDSS, I worked as a Full Stack Developer where I strengthened my skills in Node.js and React.js. My responsibilities included developing and maintaining web applications, ensuring seamless integration between the front-end and back-end, and optimizing performance for a better user experience, Visit their website for more: [UHDSS](#).

Volunteering

- Class Representative at University of Rwanda, College of Science and Technology, School of ICT, Information Technology Department from 2019 – 2024
- Senior Software Engineer on [Rwanda Biodiversity Information System](#) 2024 - present

Certifications

- JavaScript Algorithms and Data Structures (Beta) from **Freedcamp**
- JavaScript Algorithms and Data Structures from **Freedcamp**
- Django from **SOLVIT AFRICA**

Skills

- **Languages:** Python, Typescript, JavaScript, C#
- **Frameworks:** Django, ReactJS, AngularJS, NextJS, NodeJS, NestJS, Flutter
- **Mobile Development:** Expo, React Native, Flutter, LynxJS
- **Maps & GIS:** Google Map, OpenLayer, MapBox
- **Version control:** Git
